Summary

I'm a motivated and curious fresher with a passion for web development, especially in the MERN stack and Java. I enjoy learning new technologies and applying them in real projects—like my student management system and an ongoing e-commerce site for books. Along the way, I've picked up certifications in AWS Cloud Computing and database management, and I've found that I'm pretty good at solving problems, making decisions, and working well with others. I'm organized, detail-oriented, and excited to bring my skills to a team where I can keep learning and make an impact
